ORIENTED STRAND BOARD (OSB)

KTC personnel participated in the Engineering of their \$165 million Green-field OSB Production Plant in 2003, located in Broken Bow, OK USA.

The work included Project Planning and Management, Preliminary Engineering, Scheduling, Specifications, RFQ's, COT's and Capital Cost Budgeting.

During the execution phase of the project KTC personnel provided complete Process, Mechanical, Civil, Electrical, Structural Engineering and Site Assistance.

The contract included the complete Design and Supply of all OSB equipment and Support Steel.
